

# Daptor Three

## Wireless Audio Interface

### Product Overview

Daptor Three connects to your cell phone like any other **Bluetooth** Wireless Technology enabled headset. Simply press and hold the recessed button on Daptor Three to initiate pairing mode. It will first attempt to connect in hands free mode to a cell phone. If this type of connection is not available, it will connect to any other product, such as a laptop, that allows a **Bluetooth** wireless connection. This wireless headphone mode offers a full audio bandwidth stereo connection.

JK Audio products are built to the tough standards of the broadcast industry. Using a diecast aluminum enclosure and rugged components throughout, Daptor Three is built to take real world abuse. This over-engineering allows us to offer a two year warranty on all JK Audio products.
